

TOMS Rollout Management

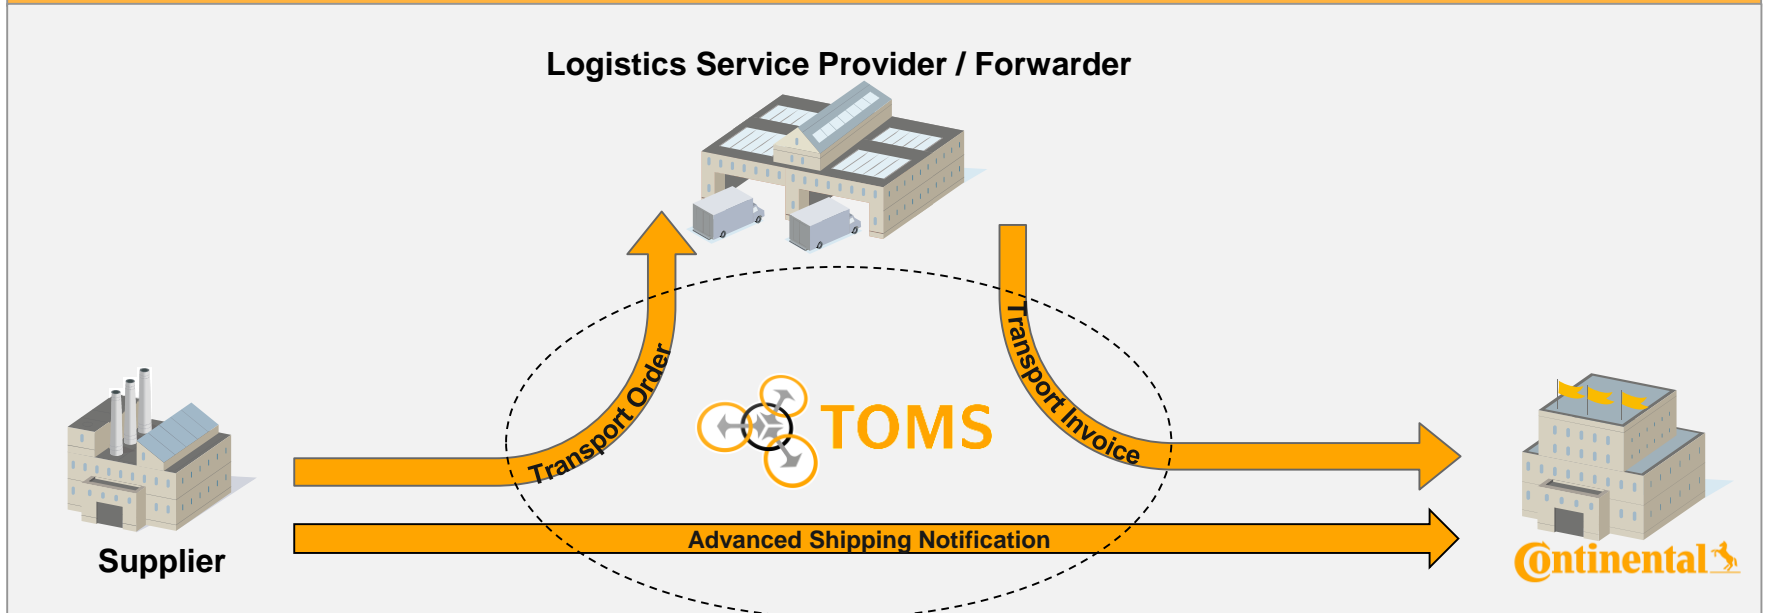

What is TOMS?

Description

- › TOMS is a Transport Order Management System (online porta; based on WebEDI) provided by the company SupplyOn
- › TOMS is used for the communication of all transport relevant information between Continental, supplier and the responsible forwarder
- › TOMS changes your current way of communication to the forwarder from mail or phone to this portal
- › TOMS is mainly used to create transport orders and Advanced Shipping Notifications (ASN)
- › TOMS is only used when Continental pays the freight costs

Instruction / Visualisation

TOMS Rollout Management

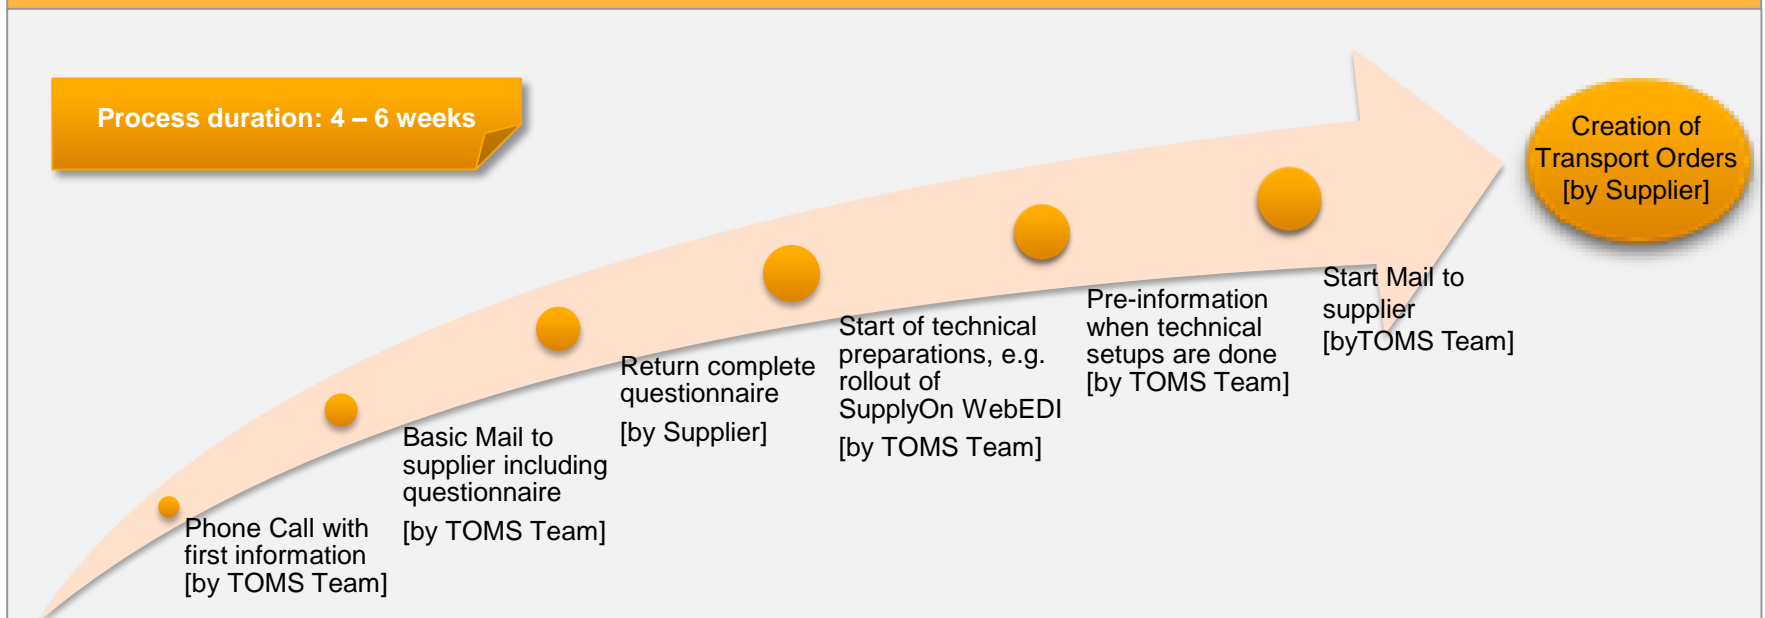

Supplier Rollout Process

Description

- › The implementation is organized by the TOMS Rollout Team
- › The usage of TOMS is mandatory
 - › TOMS is part of the supplier evaluation process BASE
 - › TOMS is part of the Supplier Manual Logistics
 - › TOMS does not change any existing ERP / SAP processes / ClassicEDI connections

TOMS Rollout Management

Your tasks within TOMS / Benefits

Description

- › **You have to create the transport order online in TOMS**
 - › Task: Complete transport order screen (example below) on time by adding /confirmation of packaging data, quantities, documents
 - › Benefit: No additional mails or phone calls to plant or forwarder necessary; TOMS will be standard for all Continental plants in the future
- › **You have to create the Advanced Shipping Notification online in TOMS** [if you don't send it already via your own ERP system to the plant]
 - › Task: Confirm/correct created transport order on time (= ASN)
 - › Benefit: WebASN implementation is cheaper and faster for suppliers as ClassicASN
